

The Biodiversity Seminar Series is pleased to announce

Dr. Mary Namaganda

From Makerere University, Uganda

presenting the talk

**“Research activities at the Makerere University Herbarium (Uganda);
the value of including DNA barcoding.”**

Abstract:

The core functions of the Makerere University Herbarium are teaching and research. The main research areas are in the fields of taxonomy and systematics, ecology, and ethnobotany. As the national herbarium, we also perform regular tasks including plant identification and field collections. Current projects in taxonomy and systematics are on Poaceae and Celastraceae, distribution of wild relatives of crops and the carnivorous plants research in ecology, and various projects on medicinal plants.

When: Thursday September 22nd 2016 at 12:00 pm

Where: Visualization Theatre, Room 1009
Biodiversity Institute of Ontario
